

Value-based Payment Services

In today's healthcare environment, providers are increasingly being asked to take on risk and deliver value. Payers are shifting from pay-for-service to pay-for-value at various speeds and degrees. Value-based payment models are being designed and implemented in almost all segments, from government sponsored programs to the private insurance market. Providers often embark on the value journey without fully understanding the potential risk. The Wakely value-based payment offerings help risk-bearing entities disentangle complex value-based payment models and manage financial risk, so that providers can focus on what they do best - caring for their patients.
